

INSPIRATIONAL TOUR DUTCH WATERMANAGEMENT 4.0

HOLLAND KINDERDIJK

ALBLASSERWARD

LEARN MORE ON FUTURE WATERMANAGEMENT

Presentation on the Dutch governmental Deltaplan 2

The Dutch government reckons with 1.20 m. average sea level rise and has designated 5 issues to be handled in the next 50 to 80 years. Find out more with the 20 minute documentary about this project and/or a presentation explaining the details and philosophies.

Interwoven with this subject is the new attitude the Dutch have to adapt to no longer only reclaiming land, but also to give land back to water and learning to be flexible in this respect.

Climate Change pros and cons

The discussion on whether a new ice age is coming or we will be flooded by either water or climate refugees is neverending. Renowned speakers can be invited on the subjects if you like, to clarify or make things even more misty.

Innovative techniques presentation

All over the globe numerous people are working on the most innovative and creative projects to meet changing weather and climate conditions. Venice, Japan, Jakarta, the US all face difficulties. In this presentation you will see gorgeous projects for housing, security and overall city-scaping. Ambitious and daring concepts, but also the tiny everyday life innovations are shown...

Reference visitors shown around:

Louisiana Government, Californian Army Dept., several groups of the Bangladesh Waterboard, Thailand Waterboard, Rumanian Mayors collective, Smit International Board, Van Oord trainees, Boskalis guests, and many other special interest groups ...
